Sprint Review 1

- <u>Features implemented</u>
- Added a React.js wireframe
- Added a basic implementation of a Flask server
- Created mock-ups of UI

- <u>Issues fixed</u>
- Corrected some mistakes in the project README

- <u>Implementation review</u> *(What went well in the implementation, what problems occurred, how problems were solved)*
- Solid communication between all team members
- Some slight confusion as to who handled what. This was fixed by using the Kanban board to assign things to individual members.

- <u>Changes made.</u>
- Deliverable #0 updated to address mistakes
- Some folder structure in the repo was shifted around

- <u>Plans for next sprint</u> *(What will be done for the next sprint)*
- Having a complete board for the game
- Implementing a basic REST API
- Implementing a landing page
- Developing the chat feature
- Creating some art assets

- <u>Scrum Review</u> *(What went well in Scrum, what could be improved, and what changes will be made)*
- Good: Basic features were selected from the Kanban board and people chose what to do during the meeting
- Improve: Some sort of order for the features to be developed by priority
- Changes: Take time next meeting to decide what should be prioritized and what can wait
